In this article, we'll take a look at 20 of the best gadgets and accessories for cyclists. We'll cover everything from bike computers to lights to locks. So whether you're a casual rider or a serious cyclist, we've got something for you.

1. Bike Computer

A bike computer is a great way to track your speed, distance, and other ride data. This can be helpful for staying on track during your rides, or for simply

seeing how far you've come.

There are a variety of different bike computers on the market, so you can find one that fits your needs and budget. Some of the most popular features include:

- Speedometer
- Odometer
- Trip timer
- Cadence sensor
- Heart rate monitor
- GPS navigation

If you're serious about cycling, a bike computer is a great investment. It can help you track your progress, stay motivated, and improve your performance.

2. Lights

If you ride your bike at night, lights are essential for safety. They make you more visible to other motorists and pedestrians, and they help you see where you're going.

There are a variety of different bike lights on the market, so you can find ones that fit your needs and budget. Some of the most popular types include:

- Headlights

- Taillights
- Combination lights

When choosing bike lights, it's important to consider the following factors:

- **Brightness:** The brightness of a light is measured in lumens. The higher the lumens, the brighter the light.
- **Beam pattern:** The beam pattern of a light determines how the light is distributed. A wide beam pattern is good for illuminating a large area, while a narrow beam pattern is good for illuminating a long distance.
- **Runtime:** The runtime of a light is how long it will last on a single charge. If you're planning on riding for long periods of time, you'll need a light with a long runtime.

3. Lock

A bike lock is essential for protecting your bike from theft. There are a variety of different bike locks on the market, so you can find one that fits your needs and budget.

Some of the most popular types of bike locks include:

- **U-locks:** U-locks are one of the most secure types of bike locks. They're made of hardened steel and are difficult to cut or break.
- **Chain locks:** Chain locks are a good option for securing your bike to a variety of objects. They're made of heavy-duty chain and are difficult to cut.

- **Cable locks:** Cable locks are a lightweight and portable option. They're not as secure as U-locks or chain locks, but they're still a good deterrent for thieves.

When choosing a bike lock, it's important to consider the following factors:

- **Security level:** The security level of a lock is determined by how resistant it is to cutting and breaking. The higher the security level, the more difficult it will be to steal your bike.
- **Weight:** The weight of a lock is an important consideration if you're planning on carrying it with you on your bike.
- **Price:** Bike locks range in price from \$20 to \$200. The price of a lock is typically determined by its security level and weight.

4. Helmet

A helmet is the most important safety gear you can wear when riding your bike. It can protect your head from serious injury in the event of a fall.

There are a variety of different bike helmets on the market, so you can find one that fits your head and style. Some of the most popular features include:

- **Ventilation:** Ventilation is important for keeping your head cool and comfortable when you're riding. Look for a helmet with vents that allow air to flow through.
- **Fit:** A helmet should fit snugly on your head without being too tight or too loose. Make sure to try on a helmet before you buy it to make sure it fits properly.

- **Style:** Bike helmets come in a variety of styles, so you can find one that matches your personality. Some helmets are designed for racing, while others are designed for casual riding.

No matter what type of bike you ride, a helmet is essential for safety. Always wear a helmet when you're riding, and make sure it fits properly.

5. Gloves

Gloves are a good way to protect your hands from the elements and from blisters. They can also provide extra grip on the handlebars.

There are a variety of different bike gloves on the market, so you can find ones that fit your needs and budget. Some of the most popular features include:

- **Padding:** Padding can help to reduce vibration and protect your hands from blisters.
- **Ventilation:** Ventilation is important for keeping your hands cool and comfortable when you're riding. Look for gloves with vents that allow air to flow through.
- **Grip:** Gloves with a good grip will help you to stay in control of your bike, even when it's wet or slippery.

Gloves are a good investment for any cyclist. They can help to protect your hands from the elements, reduce blisters, and provide extra grip on the handlebars.

6. Sunglasses

Sunglasses are a good way to protect your eyes from the sun, wind, and dust. They can also help you to see more clearly when you're riding.

There are a variety of different bike sunglasses on the market, so you can find ones that fit your needs and budget. Some of the most popular features include:

- **UV protection:** UV protection is important for protecting your eyes from the sun's harmful rays.
- **Polarization:** Polarization can help to reduce glare and make it easier to see when you're riding.
- **Fit:** Sunglasses should fit snugly on your face without being too tight or too loose. Make sure to try on sunglasses before you buy them to make sure they fit properly.

Sunglasses are a good investment for any cyclist. They can help to protect your eyes from the elements and make it easier to see when you're riding.

7. Water bottle and cage

A water bottle and cage are essential for staying hydrated when you're riding. Dehydration can lead to fatigue, cramps, and even heat stroke.

There are a variety of different water bottles and cages on the market, so you can find ones that fit your needs and budget. Some of the most popular features include:

- **Insulation:** Insulation can help to keep your water cold or hot for longer periods of time.

- **Capacity:** The capacity of a water bottle is measured in ounces. The size of water bottle you need will depend on how long you plan on riding.
- **Cage:** The cage holds the water bottle in place on your bike. Make sure to choose a cage that is compatible with your water bottle.

A water bottle and cage are a good investment for any cyclist. They can help you to stay hydrated and avoid dehydration.

8. Pump

A pump is essential for inflating your tires. Flat tires are a common problem, so it's important to have a pump with you on your rides.

There are a variety of different pumps on the market, so you can find one that fits your needs and budget. Some of the most popular features include:

- **Type:** There are two main types of pumps: floor pumps and hand pumps. Floor pumps are more powerful and easier to use,
