\* Monitoring vital signs such as heart rate, blood pressure, and respiration \*  
Tracking the movement of animals and humans \* Studying the effects of  
drugs and treatments on the body \* Diagnosing and managing diseases

The 2nd International Symposium on Biotelemetry was held in Davos, Switzerland, in May 1974. The symposium brought together leading experts in the field to discuss the latest advances in biotelemetry technology and its applications in medical research and clinical practice.

## Symposium Proceedings

The symposium proceedings were published in a book entitled "Biotelemetry II". The book contains over 100 papers on a wide range of

topics related to biotelemetry, including:

- \* New developments in biotelemetry technology
- \* Applications of biotelemetry in medical research
- \* Applications of biotelemetry in clinical practice
- \* The ethical and legal implications of biotelemetry

The book is a valuable resource for anyone interested in the field of biotelemetry.

The 2nd International Symposium on Biotelemetry was a major event in the development of the field. The symposium brought together leading experts in the field to discuss the latest advances in biotelemetry technology and its applications in medical research and clinical practice. The proceedings of the symposium were published in a book entitled "Biotelemetry II", which is a valuable resource for anyone interested in the field of biotelemetry.
